GHS09

: pentane; heptane; n-heptane; naphtha (petroleum), hydrotreated light <0.1% benzene weight by weight (n o EINECS 200-753-7).

GHS07

Safety data sheet

in line with Regulation (EEC) no. 1907/2006 (REACH) as modified by Regulation (EU) 2015/830

| Hazard statements (CLP) | : H225 - Highly flammable liquid and vapour. |
|--------------------------------|---|
| | H304 - May be fatal if swallowed and enters airways. |
| | H315 - Causes skin irritation. |
| | H336 - May cause drowsiness or dizziness. |
| | H411- Toxic to aquatic life with long-lasting effects. |
| Precautionary statements (CLP) | : P102 - Keep out of reach of children. |
| | P210 - Keep away from heat, hot surfaces, sparks, open flames |
| | and any other ignition source. Do not smoke. |
| | P261 - Avoid breathing papers. |
| | P271 - Use only outdoors or in a well-ventilated area. |
| | P301 + P310 - IF SWALLOWED: immediately call a POISON |
| | CENTER or doctor/physician. |
| | P331 - DO NOT induce vomiting. |
| | P501 - Dispose of contents/container to a licensed hazardous- |
| | waste disposal contract or collection site. |
| EUH phrases | : EUH066 - Repeated exposure may cause skin dryness or |
| | cracking. |
| Child-resistant fastening | : Applicable |
| Tactile warnings of danger | : Applicable |
| 2.3 Other hazards | |
| | |

No additional information available

| SECTION 3: Composition/information on ingredi 3.2 Mixtures | | | |
|--|--|-------|---|
| Name | Product identifier | % | Classification according to Regulation (EEC) no. 1272/2008 [CLP] |
| Naphtha (petroleum), hydrotreated light; low boiling point hydrotreated naphtha; [a complex combination of hydrocarbons obtained by treating a petroleum fraction with hydrogen in the presence of a catalyst. It consists of hydrocarbons having carbon numbers predominantly in the range of C4 through C11 and boiling in the range of approximately minus 20° C to 190° C (-4°F to 374°F).] (Note P) applied | (CAS no.) 64742-49-0 (EC no.) 265-151-9 (Index no.) 649-328-00-1 (REACH no.) 01-2119475133-43 | 50-75 | Flam. Liq. 2, H225 Muta. Not classified Carc. Not classified Asp. Tox. 1, H304 Aquatic Chronic 2, H411 |

| Heptane; n-heptane (Note C) | (CAS no.) 142-82-5 (EC no.) 205-563-8 (Index no.) 601-008-00-2 (REACH no.) 01-2119457603-38 | 10-25 | Flam. Liq. 2, H225 Skin Irrit. 2, H315 STOT SE 3, H336 Asp. Tox. 1, H304 Aquatic Acute 1, H400 Aquatic Chronic 1, H410 |

Note C: Some organic substances may be marketed either in a specific isomeric form or as a mixture of several isomers. In this case the supplier must state on the label whether the substance is a specific isomer or a mixture of isomers.

Note P: The classification as a carcinogen or mutagen need not apply if it can be shown that the substance contains less than 0.1% w/w benzene (EINECS No 200-753-7). When the substance is not classified as a carcinogen at least the precautionary statements (P102-)P260-P262-P301 + P310-P331.. This note applies only to certain complex oil-derived substances in Part 3. Full text of H-statements: see section 16

SECTION 4: First aid measures

4.1 Description of first aid measures First-aid measures general

First-aid measures after inhalation

Thist-alu measures general

: Symptoms of poisoning may not occur for hours. Call a doctor immediately. When consulting a doctor, always keep packaging or label.

: Remove person to fresh air and keep comfortable for breathing. Respiratory problems: consult a doctor/medical service. If breathing stops, apply artificial respiration.

COLEMAN FUEL

Safety data sheet

in line with Regulation (EEC) no. 1907/2006 (REACH) as modified by Regulation (EU) 2015/830

| First-aid measures after skin contact | : If symptoms develop: immediately rinse with plenty of water. Do not remove clothing if stuck to skin. Rinse skin with |
|---|---|
| | water/take a shower. Immediately remove all contaminated clothing. In the event of skin irritation: consult a doctor. |
| First-aid measures after eye contact | : If eye irritation persists, consult an eye specialist. Immediately rinse with water for a prolonged period (at least 15 minutes) while holding the eyelids wide open. Remove contact lenses if the victim wears them and they can be removed easily. Continue to |
| First-aid measures after ingestion | rinse. Rinse eyes with water as a precautionary measure. : Rinse mouth. Remove victim to fresh air and ventilate the suspect area. Do not induce vomiting. Call a doctor immediately |
| 4.2 Most important symptoms and effects, both acute and delayed | |
| Symptoms/effects | : May cause drowsiness or dizziness. |
| Symptoms/effects after skin contact | : Irritation. Repeated exposure may cause skin dryness or |
| Symptoms/effects after ingestion | cracking. : Risk of lung oedema. |

4.3 Indication of any immediate medical attention special treatment needed

Treat symptomatically.

| SECTION 5: Firefighting measures | |
|---|---|
| 5.1 Extinguishing media | |
| Suitable extinguishing media | : Water spray. Dry powder. Foam. Carbon dioxide. |
| Unsuitable extinguishing media | : Do not use a heavy water stream. |
| 5.2 Special hazards arising from the substance or mixture | |
| Fire hazard | : Highly flammable liquid and vapour. |
| Hazardous decomposition products in the event of fire | : Toxic fumes may be released. |
| 5.3 Advice for firefighters | |
| Precautionary measures fire | : Evacuate the area. |
| Firefighting instructions | : Cool closed containers exposed with water spray or mist. |
| Protection during the firefighting | Remove ignition sources if this can be done safely. |
| | : Do not attempt to take action without suitable protective |
| | equipment. Self-contained breathing apparatus. Complete |
| | protective clothing. |

| SECTION 6: Accidental release measures | |
|--|---|
| 6.1 Personal precautions, protective equipment and emergen | cy procedures |
| General measures | Remove ignition sources. Remove unnecessary personnel. Evacuate the area. |
| 6.1.1 For non-emergency personnel | |
| Emergency procedures | : Ventilate spillage area. Remove unnecessary personnel. |
| | Evacuate the area. No open flames, no sparks, no smoking. Avoid inhaling vapour. Avoid contact with skin and eyes |
| 6.1.2 For emergency responders | |
| Protective equipment | : Do not attempt to take action without suitable protective equipment. For further information refer to section 8: "Exposure controls/personal protection". |
| Emergency procedures | : Contain the spill if safe to do so. Mechanically ventilate spillage area whilst avoiding the formation of explosive concentrations. Prevent formation of electrostatic charges. |
| 6.2 Environmental precautions | |
| Prevent liquid from entering drains, watercourses, groundwat | ter or bedrock. Alert the authorities if the liquid enters drains or public |
| watercourses. Keep recovered product for subsequent dispose | al. |
| 6.3 Methods and material for containment and cleaning up | |
| For containment | : Collect spillage. |
| Methods for cleaning up | : Take up liquid spill into absorbent material. Alert the authorities if liquid enters drains or public watercourses. |
| Other information | : Dispose of materials or solid residues at an authorised site. |

Other information 6.4 Reference to other sections

For further information refer to section 13.

Safety data sheet

in line with Regulation (EEC) no. 1907/2006 (REACH) as modified by Regulation (EU) 2015/830

| SECTION 7: Handling and storage | |
|--|--|
| 7.1 Precautions for safe handling | |
| Precautions for safe handling Hygiene measures | : Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Ground/bond container and receiving equipment. Do not use tools that produce sparks. Take precautionary measures against electrostatic discharge. Flammable vapour may build up in the container. Use a flame-proof device. Wear personal protection equipment. Use outside or in a well-ventilated area only. Avoid inhaling vapour. Avoid contact with skin and eyes. Do not switch mobile telephones on. Assess possible risks of explosive atmosphere and the need for anti-explosion equipment (ATEX). Wash contaminated clothing before reuse. Do not eat, drink or |
| | smoke when using this product. Always wash hands after handling the product. |
| 7.2 Conditions for safe storage, including any incompatibilities | |
| Technical measures | : Ground/bond container and receiving equipment. |
| Storage conditions | Keep away from open flames, hot surfaces and ignition sources. Store in a well-ventilated place. Keep cool. Keep container tightly closed. Keep under lock and key. |
| Storage temperature | : <40°C |
| 7.2 Specific and use(s) | |

7.3 Specific end use

See section 1.

8.2 Exposure controls

Appropriate engineering controls:

Ensure good ventilation of the workstation.

Personal protective equipment:

High concentration of gas/vapour: gas mask. Face shield. Insulating gloves.

Protective clothing - selection of equipment:

Antistatic flame-retardant protective equipment

Hand protection:

Wear suitable gloves complying with EN374. Breakthrough time to be determined by the manufacturer of the gloves. The choice of a suitable glove depends not only on the material, but also on other quality characteristics and may differ from one manufacturer to another

Eye protection:

Face shield. Use eye protection designed to protect against splashes in accordance with EN166.

Marmot Marmot

COLEMAN FUEL

Safety data sheet

in line with Regulation (EEC) no. 1907/2006 (REACH) as modified by Regulation (EU) 2015/830

Skin and body protection:

Wear antistatic clothing and shoes. The floor should be earthed.

Environmental exposure controls:

Avoid release to the environment.

Other information:

Keep away from food and drink, including animal feedstuffs. Remove contaminated clothing and wash before reuse. Avoid contact with skin and eyes. Do not eat, drink or smoke while using this product. Observe the security notices. Emergency eyewash and shower facilities must be provided in the proximity of any areas where there is a risk of exposure.

| SECTION 9: Physical and chemical properties | |
|---|---|
| 9.1 Information on basic physical and chemical properties | |
| Physical state | : Liquid |
| Appearance | : Fluid |
| Molecular mass | : 91.7 g/mol |
| Colour | : Colourless |
| Odour | : Characteristic |
| Odour threshold | : No data available |
| рН | : No data available |
| Relative evaporation rate (butylacetate = 1) | : No data available |
| Melting point | : n/a |
| Freezing point | : No data available |
| Boiling point | : 69°C |
| Flashpoint | : -15°C |
| Auto-ignition temperature | : 200°C |
| Decomposition temperature | : No data available |
| Flammability (solid, gas) | : n/a |
| Vapour pressure | : 23314 Pa @ 20°C |
| Vapour pressure at 50°C | : 680.24 hPa |
| Relative vapour density at 20°C | :>1 |
| Relative density | : 0.689 @ 20°C |
| Mass density | : 689 kg/m³ |
| Solubility | : Insoluble in water. Soluble in most organic solvents. |
| Log Pow | : No data available |
| Viscosity, kinematic | : <20.5 mm²/s @ 40°C |
| Viscosity, dynamic | : 0.44 cP |
| Explosive properties | : No data available |
| Oxidising properties | : No data available |
| Explosive limits | : No data available |
| 9.2 Other information | |
| COV content | : 100% |

SECTION 10: Stability and reactivity

10.1 Reactivity

Highly flammable liquid and vapour. The product is stable under normal handling, storage and transport conditions.

10.2 Chemical stability Stable under normal conditions.

10.3 Possibility of hazardous reactions

No dangerous reaction known under conditions of normal use.

10.4 Conditions to avoid

Avoid contact with hot surfaces. Heat. No flames or sparks. Remove all ignition sources.

10.5 Incompatible material

Combustible materials, oxidising substances. Strong acids. Strong alkalis.

Safety data sheet

in line with Regulation (EEC) no. 1907/2006 (REACH) as modified by Regulation (EU) 2015/830

10.6 Hazardous decomposition products

Under normal conditions of storage and use, hazardous decomposition products should not be produced.

| Recommendations for handling the product/packaging | : Dispose of in accordance with the local/national safety rules in |
|--|--|
| | force. |
| Additional information | : Flammable vapour may build up inside the container. |
| European Waste Catalogue (EWC) code | : Waste Code to be filled in depending on use and in accordance |
| | with the list of Decision 2000/352/EC |
| HP code | : H3-A - "Flammable": |
| | – liquid substances and preparations (including highly flammable |
| | liquids) with a flashpoint below 21°C, or |
| | – substances and preparations which may become hot and finally |
| | catch fire in contact with air at ambient temperature without any |
| | application energy, or |
| | solid substances and preparations which may readily catch fire |
| | after brief contact with a source of ignition and which continue to |
| | burn or to be consumed after removal of the source of ignition, |
| | or |
| | gaseous substances and preparations which are flammable in |
| | air at normal pressure, or |
| | substances or preparations which, in contact with water or |
| | damp air, evolve highly flammable gases in dangerous quantities. |
| | H4 - "Irritant": non-corrosive substances and preparations which, |
| | through immediate, prolonged or repeated contact with the skin |
| | or mucous membrane, can cause inflammation. |
| | H6 - "Toxic": substances and preparations (including very toxic |
| | substances and preparations) which, if they are inhaled or |
| | ingested or they penetrate the skin, may involve serious, acute or chronic health risks and even death. |
| | |
| | H14 - "Ecotoxic": substances and preparations which present or may present immediate or delayed risks for one or more sectors |
| | of the environment. |
| | HP5- "Specific Target Organ Toxicity (STOT)/aspiration toxicity": |
| | waste that may cause specific toxicity for a target organ through |
| | single or repeated exposure, or acute toxic effects following |
| | aspiration. |
| | aspiration |

| SECTION 15: Regulatory information | |
|---|---|
| 15.1 Safety, health and environmental regulations/legislation specif | ic for the substance or mixture |
| 15.1.1 EU regulations | |
| Restrictions are applicable according to Annex XVII of the REACH reg | gulation (EC) no. 1907/2006: |
| 28. Substances included in annex VI, part 3, of Regulation (EC) no. 1272/2008 classified as "category 1A or 1B carcinogen" and listed in appendix 1 or appendix 2 respectively. | Naphtha (petroleum), hydrotreated light; low boiling point hydrotreated naphtha; [a complex combination of hydrocarbons obtained by treating a petroleum fraction with hydrogen in the presence of a catalyst. It consists of hydrocarbons having carbon numbers predominantly in the range of C4 through C11 and boiling in the range of approximately minus 20°C to 190°C (-4°F to 374°F).] |
| 29. Substances included in annex VI, part 3, of Regulation (EC) no. 1272/2008 classified as "category 1A or category 1B mutagen" and listed in appendix 3 or appendix 4 respectively. | Naphtha (petroleum), hydrotreated light; low boiling point hydrotreated naphtha; [a complex combination of hydrocarbons obtained by treating a petroleum fraction with hydrogen in the presence of a catalyst. It consists of hydrocarbons having carbon numbers predominantly in the range of C4 through C11 and boiling in the range of approximately minus 20°C to 190°C (-4°F to 374°F).] |
| 40. Substances classified as flammable gases, category 1 or 2, flammable liquids, category 1, 2 or 3, flammable solids, category 1 or 2, substances and mixtures which produce flammable gases in contact with water, category 1, 2 or 3, pyrophoric liquids, category 1, or pyrophoric solids, category 1, whether or not they are included in annex VI, part 3, of Regulation (EC) no. 1272/2008. 3(c). Substances or mixtures which fulfil the criteria for one of the below hazard classes or categories referred to in annex 1 to Regulation (EC) no. 1272/2008: hazard class 4.1 | pentane - heptane; n-heptane - Naphtha (petroleum), hydrotreated light; low boiling point hydrotreated naphtha; [a complex combination of hydrocarbons obtained by treating a petroleum fraction with hydrogen in the presence of a catalyst. It consists of hydrocarbons having carbon numbers predominantly in the range of C4 through C11 and boiling in the range of approximately minus 20°C to 190°C (-4°F to 374°F).] COLEMAN FUEL - pentane - heptane; n-heptane - Naphtha (petroleum), hydrotreated light; low boiling point hydrotreated naphtha; [a complex combination of hydrocarbons obtained by treating a petroleum fraction with hydrogen in the presence of a catalyst. It consists of hydrocarbons having carbon numbers predominantly in the range of C4 through C11 and boiling in the range of approximately minus 20°C to 190°C (-4°F to 374°F).] |
| 3. Liquid substances or mixtures considered dangerous within the meaning of Directive 1999/45/EC or which fulfil the criteria for one of the below hazard classes or categories referred to in annex I to Regulation (EC) no. 1272/2008 | pentane - heptane; n-heptane - Naphtha (petroleum), hydrotreated light; low boiling point hydrotreated naphtha; [a complex combination of hydrocarbons obtained by treating a petroleum fraction with hydrogen in the presence of a catalyst. It consists of hydrocarbons having carbon numbers predominantly in the range of C4 through C11 and boiling in the range of approximately minus 20°C to 190°C (-4°F to 374°F).] |
| 3(a). Substances or mixtures which fulfil the criteria for one of the below hazard classes or categories referred to in annex I of Regulation (EC) no. 1272/2008: hazard classes 2.1 to 2.4, 2.6 and 2.7, 2.8 types A and B, 2.9, 2.10, 2.12, 2.13 categories 1 and 2, 2.14 categories 1 and 2, 2.5 types A to F | COLEMAN FUEL - pentane - heptane; n-heptane - Naphtha (petroleum), hydrotreated light; low boiling point hydrotreated naphtha; [a complex combination of hydrocarbons obtained by treating a petroleum fraction with hydrogen in the presence of a catalyst. It consists of hydrocarbons having carbon numbers predominantly in the range of C4 through C11 and boiling in the range of approximately minus 20°C to 190°C (-4°F to 374°F).] |

Safety data sheet

in line with Regulation (EEC) no. 1907/2006 (REACH) as modified by Regulation (EU) 2015/830

| 3(b). Substances or mixtures which fulfil the criteria for one of the below hazard classes or categories referred to in annex I of Regulation (EC) no. 1272/2008: hazard classes 3.1 to 3.6, 3.7 adverse effects on sexual function and fertility or on development, 3.8 effects other than narcotic effects, 3.9 and 3.10 | COLEMAN FUEL - pentane - heptane; n-heptane - Naphtha (petroleum), hydrotreated light; low boiling point hydrotreated naphtha; [a complex combination of hydrocarbons obtained by treating a petroleum fraction with hydrogen in the presence of a catalyst. It consists of hydrocarbons having carbon numbers predominantly in the range of C4 through C11 and boiling in the |
|--|---|
| | range of approximately minus 20°C to 190°C (-4°F to 374°F).] |

Contains no substances on the REACH candidate list

Contains no REACH Annex XIV substances

Contains no substances subject to REGULATION (EU) no. 649/2012 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 4 July 2012 concerning the export and import of hazardous chemicals

The substance(s) is/are not subject to Regulation (EC) 850/2004 of the European Parliament and of the Council of 29 April 2004 on persistent organic pollutants and amending Directive 79/117/EEC

COV content Directive 2012/18/EU (SEVESO III) Additional Seveso indications : 100%

: 34. Petroleum products and alternative fuels: a) gasolines and naphthas; b) kerosenes (including jet fuels); c) gas oils (including diesel fuels, home heating oils and gas oil blending streams); d) heavy fuel oils; e) alternative fuels serving the same purposes and with similar properties as regards flammability and environmental hazards as the products referred to in points a) to d).

15.1.2 National regulations

Ensure that all national and local rules are followed

| France | | | |
|-----------|--|--------|------------|
